

OpalArt™

Our hypnotic OpalArt family embraces the moment when disparate glasses meet, and freezes it for all time. The resultant swirls of color are magnificent, always unique, and deliver incomparable options in project design.

Crystal Opal

The translucent, almost ghostly quality of Crystal Opals distinguishes them from more common opalescent products. The glass gathers and disperses light like the crystal for which it is named.

We've taken great care to present our glass as true-to-life as possible. Since computer monitors and printers vary widely, and may not reliably portray the glass or its color, please use this sheet as a reference tool only. You may want to consider purchasing a glass Sample Set for selecting just the right glass for your projects.
